RE: Class I UIC Non-Hazardous Permit Application
PILARSKI 1-12 WELLBORE ADDITIONAL INFORMATION
SECTION 12, GRANT TOWNSHIP, MECOSTA COUNTY MICHIGAN

Sent: VIA E-MAIL

Dear Mr. Batka:

Please find attached, respectfully submitted to your attention for formal review, in request to our email correspondence dated June 22nd, 2015; whereby, additional plugging detail was requested regarding the Pilarski 1-12 located in the NE/4 NE/4 Section 12, Grant Township, Mecosta County Michigan.

The Pilarski 1-12 was drilled, plugged back, whipstocked, and subsequently plugged.

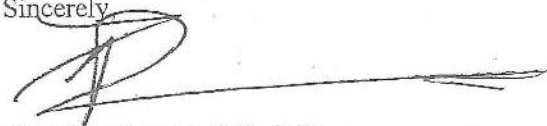

Please find attached,

- (1) the FIRST plugging report dated 2/2/1984, but reporting a 11-18-1983 cement kick-off plug; and
- (2) the FINAL plugging report by Halliburton for the subject well following kick-off dated 1-2-1984; and
- (3) a wellbore diagram of the subject well reflecting the above daily report; and
- (4) for ease of reference, our prior email correspondence dated June 22nd, 2015.
- (5) reattached for reference, the entire wellfile, so you can reach an independent conclusion.

It appears that William Booker, on behalf of PPG, did not submit a correct Mineral Plugging Report, reflecting the FINAL plugging procedure as identified by the daily plugging report dated 1-2-1984 by Halliburton.

Please feel free to contact me directly with comments, questions, or concerns.

Sincerely,

Theodore Pagano, P.E., P.G.
